

Install IBM Cloud CLI

Step 1:

<https://cloud.ibm.com/docs/cli?topic=cli-install-ibmcloud-cli>

Click on the above link that will redirect to the CLI installation page of IBM Cloud.

Step 2:

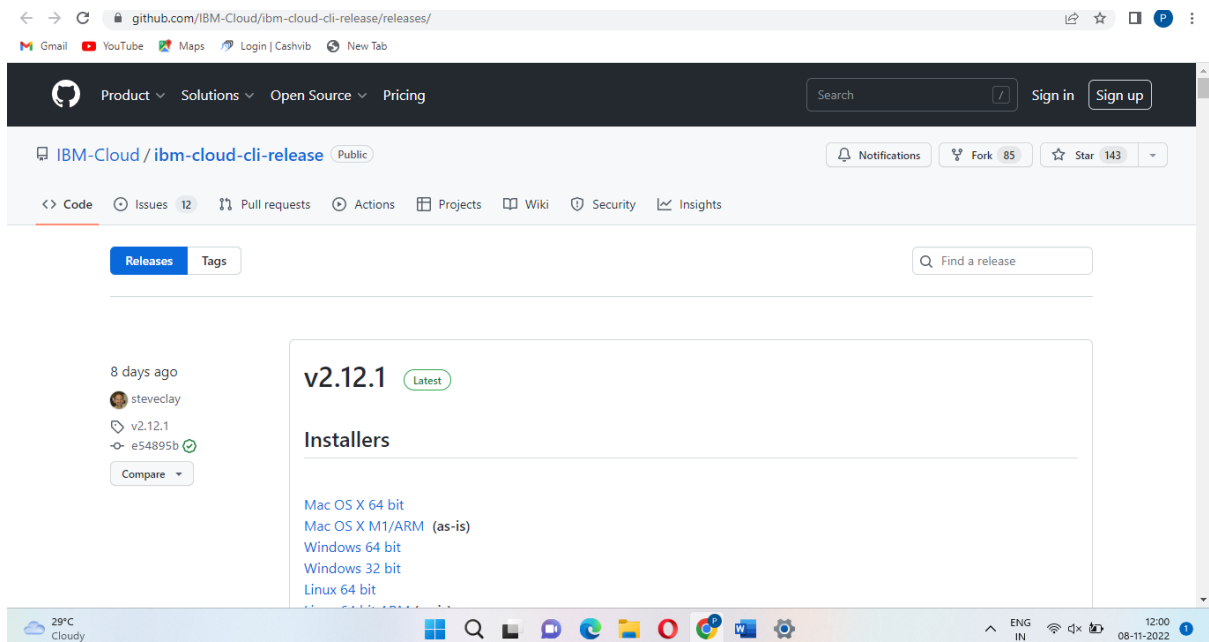

There you will be able to find the Installing with the Installer.

[ibm-cloud-cli-releases](#)

Click on the above link.

Step 3:

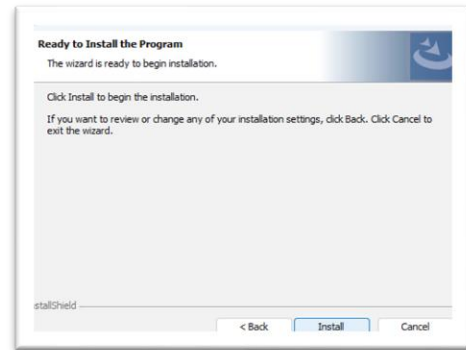

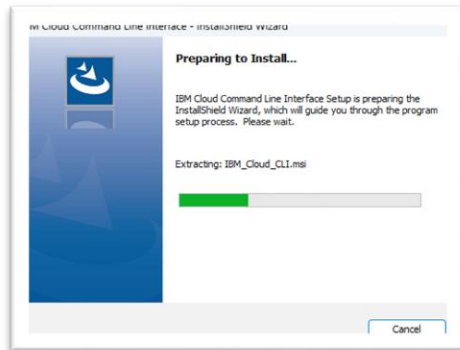

You will be redirected to the GitHub Repository page where you can see several versions of the IBM Cloud CLI.

Select the matching binary of your platform to begin the download.

Step 4:

After downloading the .exe file just do install the file.

We just installed the IBM Cloud CLI in our systems.

Updates in IBM Cloud CLI:

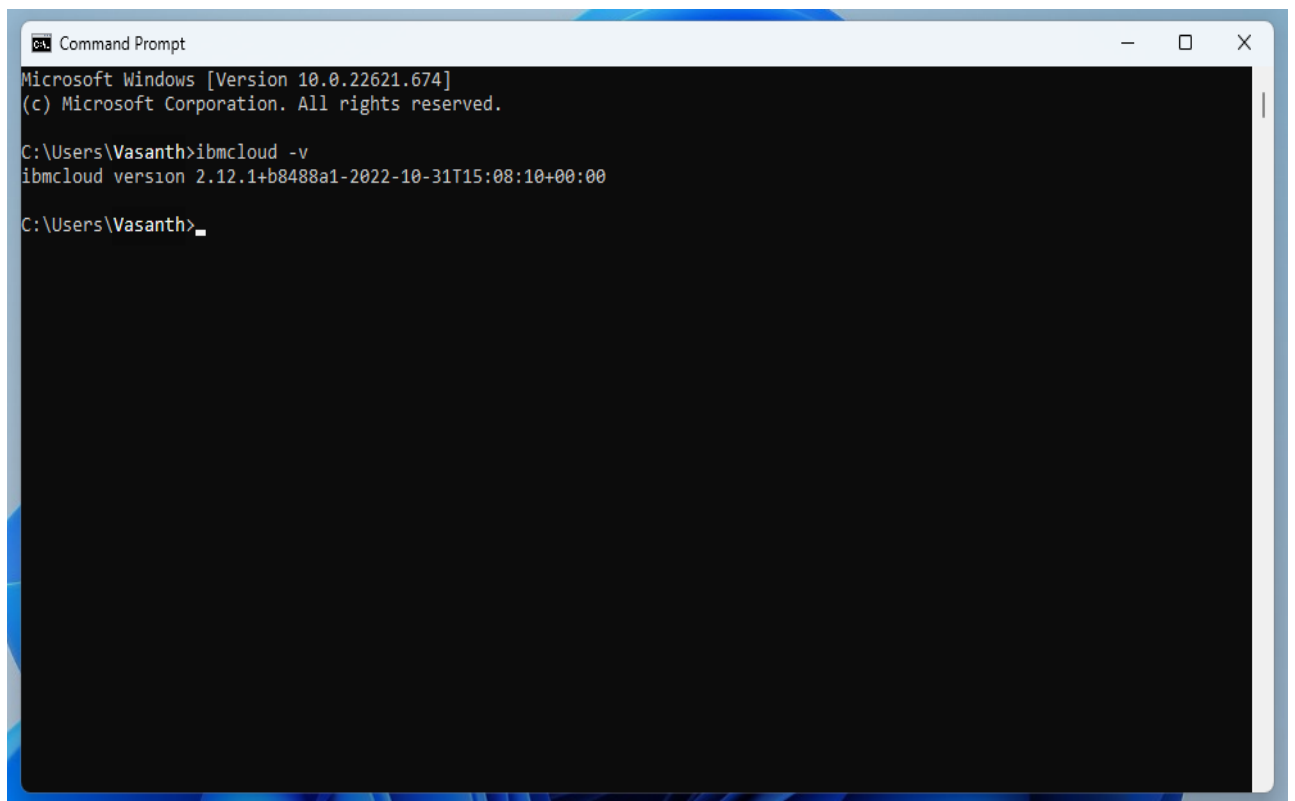

This screenshot shows a Windows Command Prompt window with the title 'Command Prompt'. The text inside the window is as follows:

```
Microsoft Windows [Version 10.0.22621.674]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Vasanth>ibmcloud update
Checking for updates...
No update required. Your CLI is already up-to-date.
To view available plugin updates, run 'ibmcloud plugin list'.

C:\Users\Vasanth>
```

Versions:

```
